

Recording using the Elmo

Review this checklist before you begin:

- ✓ Be sure that your Elmo is connected and that the Grabber Driver is installed (your CTA may be able to help with this).
- ✓ Be sure that you have **ImageMate208** installed on your computer
- ✓ Turn the Elmo on and view the image on your computer screen
- ✓ Have a microphone plugged into the computer and ready to go

1. Open ImageMate208.

2. Open the "Recording Tools" window.

3. Select the **red button**.

4. You will be prompted to **save** the video file before the recording actually begins.

5. The recording will begin as soon as you finish saving.

6. During the recording:

	Displays the amount of free space on the drive (when the amount of free space is 5% or less, recording stops). A red bar shows the area of use.
	Displays the recording time. Days/Hours:Minutes:Seconds

7. To stop the recording, select the black box.
