

## Viewing Materials in Write Source

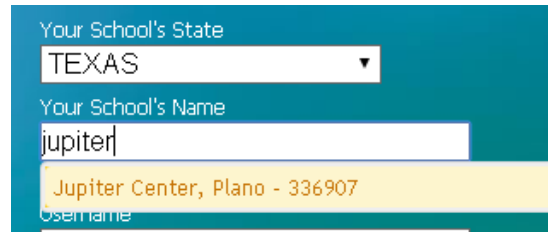

---

*Special Ed teachers, Instructional Specialists, Librarians, etc. do not have personal logins for the Write Source program but may follow these directions for viewing the materials online. Only classroom teachers will be able to assign activities.*

After installing the WriteSource program from the App Depot, the program will be launched from the Language Arts folder in PISD Apps. You can also use the web address <http://ws.hmhpublish.com> from home or school.

### Logging In

Click the **Login** button, then the **Choose a different school** link. Select Texas from the state drop-down list and type jupiter in the school name field to select Jupiter Center.

The screenshot shows a login form with a teal header. It contains two input fields: 'Your School's State' with a dropdown menu set to 'TEXAS', and 'Your School's Name' with the text 'jupiter' entered. Below these fields, a yellow highlight shows the selected school: 'Jupiter Center, Plano - 336907'. A 'Username' label is visible at the bottom of the highlighted area.

**Username:** [content2@pisd.edu](mailto:content2@pisd.edu)

(The "2" in this email address represents grade 2; substitute grades 3, 4, and 5 as needed. Write Source is available for grades 2-5.)

**Password:** Password= **PISDcontent** (case sensitive) for all grade levels

*The generic login above will allow you to see grade-level materials for the grade level that corresponds to the email address you used when logging in.*

The full Write Source manual for classroom teachers includes instructions on creating classes and making assignments. This manual is available on the PISD Language Arts planner. Once logged in to the LA planner (<http://ec.pisd.edu>), click the blue **Resources** button at the top of the page, then scroll down slightly to the "Technology Resources" area.

When students log in, they must indicate their state and school name from drop-down menus. Because some schools are listed according to the entire namesake of the school (i.e. Charles Wesley Andrews or David McCall), a list of Plano ISD school names has been provided in the Technology Resources area of the Language Arts curriculum planner (see above).

After selecting the state and school name, **students enter their 6-digit ID# in both the username and password fields.**

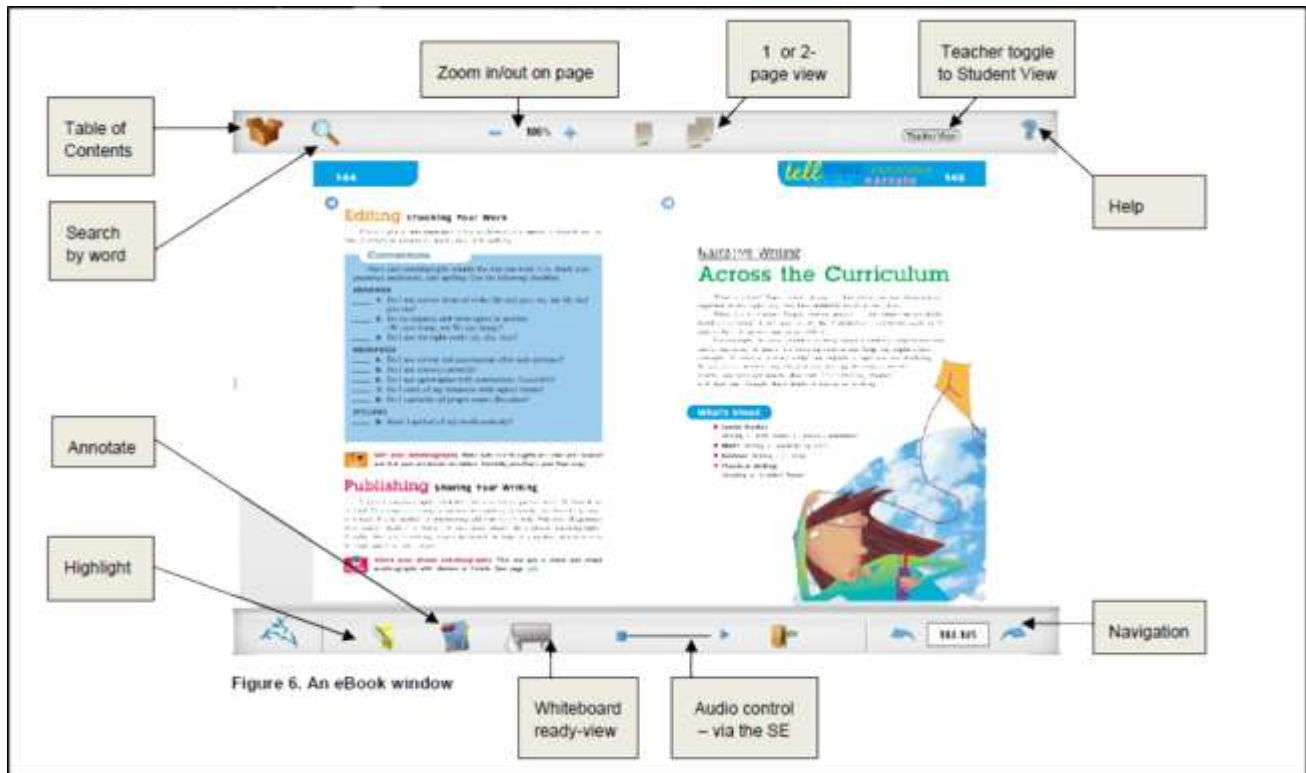

## Viewing the Online Teacher Edition

Click the **View All** link near the bottom of the screen.

Double-click the cover of the desired book to open it.

**Note:** Plano ISD purchased *ONLY* the English version of Write Source. You may see Spanish editions on the book shelf, but that is because you are logged in generically.

To use “highlighter” or “notes,” click the highlighter or notes icon once, then click anywhere on the page to activate. The notes and highlights will **not** be saved when you close the book.

Since the ebooks open in a new window, you can click on the red “X” in top-right hand corner of the screen to close them without closing your entire dashboard.

## Previewing Net-text Activities

Click the **Net-text** icon.

Hover your mouse over any of the Net-text icons on the bookshelf to view its title. When you select the desired title, click the **View this Net-text** button to see its contents.

# Previewing Grammar Snap Activities

Click the **Grammar Snap** icon.

Use the **Launch** button to view that part of the lesson.

These icons are only indicators of where you are in the **Grammar Snap** lesson.

## Interactive Whiteboard Lessons

Click this icon for interactive whiteboard lessons.

Select the desired lesson, then click the **View Online** button. A new window will open. It may take several seconds for the lesson to appear.
